Subject: FW: Geotechnical Testing for Lower Passaic River

Hi Todd,

As an alternative to the ASTM C295 Petrographic Examination, I can suggest an ISRM Petrographic Description. This just looks at a single sample and gives you a list of minerals and a rock identification. It is most commonly used in the evaluation of stone with intended use for rip rap, bank stabilization, armor stone, etc..I have attached a copy of our petrographer's report.

Thanks
Mark
